EDUCATION

University of Houston, Houston, TX

Bachelor of Science, Petroleum Engineering

Minor: **Mathematics**

August 2011 - May 2017

Experience

Completions Service Manager

TechnipFMC / Midland, Tx / April 2019 – February 2020

- Planned and organized the overall implementation of onshore completion activities in accordance with the approved programs, procedures and practices with the specific objective of safeguarding the safety of personnel and property
- Managed the development, integration and implementation of well completion programs in order to meet the target in the safest, cost effective and timely manner to involve engineering, project & facilities, and production departments
- Directed all completions operations for Chevron including tubing head installs, toe preps, fracks, drill outs and installation of flow back trees while maintaining zero non-conformance issues with all direct reports on all pads
- Provided technical expertise to trouble-shoot major operational problems, such as blow out, rig on fire or serious accidents that may occur during operations
- Managed the technical and logistical support for integrated pads including administrative functions of scheduling, forecasting and billing activities in the field
- Maintained constant communication with Chevron's WSMs on issues, job procedures and new requirements to ensure successful and efficient operations

Account Manager

Pumpco Services / Midland, Tx / April 2018 - April 2019

- Responsible for P&L oversight, district NPT analysis, solution-based engineering controls, formal quotations, contractual negotiations and request for proposals
- Generated financial forecasts and compile data for internal cost analysis presentations on a monthly, quarterly and annual basis
- Worked collaboratively with engineering advisors, operations, and management resources in order to meet account performance objectives and customers' expectations
- Responsible for securing revenue targets against an assigned quota, ensured profitability of the relationship, and secured additional work by refining operational capabilities to meet client's needs
- Built long-term relationships with customer's staff, management, and executives across all aspects of the oilfield life cycle to drive organic expansion revenue
- Established effective teamwork with the broader organization to include marketing, training, client services, research and consulting

Frac Field Engineer

Pumpco Services / Midland, Tx / August 2017 – April 2018

- Completed pre-job tasks in conjunction with field personnel such as bucket tests, sand/silo checks, water analysis and other fluid preparations on location
- Prepared pre-job paperwork in order to be utilized during the job such as treatment reports, sand trackers, pump schedules, etc.
- Performed job calculations, monitored jobs, prepared post job reports, executed job designs, pricing and maintained quality control
- Assisted the District Engineer and/or District Manager in day-to-day operations of the district and provides technical sales support to the district staff
- Communicated with all departments through phone calls and e-mails to discuss on/off the job issues
- Programmed stimulation treatments (slurries/fluids) and monitored treatment/chemical plots for each job to analyze well conditions and job requirements at the wellsite
